loader scale

The **Legaloader V** loader scale is absolutely the easiest scale to use and maintain. The accuracy is well within 1% on most loaders and the bright easy to read display makes loading 24 hours a day a breeze. On-site supervised installation will ensure that when finished you will know from then on your trucks will be loaded properly and your operators are more productive as a result.

The **Legaloader V** loader scale provides all the features an operator needs for fast, accurate readouts of single and accumulated load weight totals in front-end loaders, fork lifts, container lifts or other hydraulic lift equipment.

Nothing is easier than the Legaloader V

Accurate and reliable loader scale

Features

- Continuous Lifting Movement
- Time Proven Magnetic Switch Operation
- Bright LCD displays
- Full-Digit Weight Display up to 999,990
- Automatic "zero"
- Rugged, Durable, and Shock Resistant
- Preview feature lets the operator know the amount of material in the truck before the final bucket is entered
- Space-Saving size
- On-site supervised installation anywhere in North America

Great for **FORKLIFTS**, too.

Legaloader V Loader Scale

The **Legaloader V** has all the features an operator needs for fast, accurate readouts of single and accumulated load weight totals in front-end loaders, fork lifts or other hydraulic lift equipment.

How the Legaloader V system works

A pressure transducer tapped into the loader's main hydraulic lift line senses the pressure required to lift the bucket. The **Legaloader V** converts this pressure reading into a weight reading when the bucket is raised past the magnetic switch. Digital displays in the cab show the weight of each bucket and the accumulation reading, which can be reset for the next load.

What's new about the Legaloader V

This redesigned scale is a refinement of the popular Legaloader III series of scales, first put into service over a decade ago. The new design is smaller and lighter yet retains durability and accuracy demanded by industry professionals. Preview window and Top Off mode for quicker loading.

Viking Scales, Inc. Provides a Technical Representative For Installation and Supervision

The small 6"H x 6"W x 3"D **Legaloader V** computer unit can be installed in any front-end loader, fork lift, or other hydraulic lifting device (call us for specific application), and we send a Technical Rep to supervise installation and to instruct your personnel in the most efficient usage. **Legaloader V's** are sold and serviced world-wide by "the folks who don't mind a little dirt on their boots."

Field Tested and Proven

Each **Legaloader V** has been thoroughly field-tested and is so rugged and reliable, we back it with a full one-year limited warranty. The durable all-metal cabinet is highly resistant to extreme conditions of dust, moisture, heat and cold.

Features

- Time Proven Magnetic Switch Permits Continuous Lifting Movement
- Bright LCD displays
- Full-Digit Weight Display up to 999,990
- Automatic "zero"
- Universal Shock Absorbent Mounting System to permit installation almost anywhere in the cab.
- Preview feature lets the operator know amount in truck before the final bucket is entered.
- Optional Printer Available

Specifications

- Maximum bucket weight 99,990
- Maximum accumulated weight 999,990
- Accuracy +/- 1/2 of 1 percent to 1 1/2 percent
- Power supply 12 VDC or 24 VDC
- Size of unit 6" x 6" x 3"
- Shipping weight approx. 20 pounds
- Can be calibrated to read in pounds, tons or kilos.
- Made, with pride, in the USA and warranted for a full 12 months
